RE: Follow-up Revised Grinder Pump Program

Dear Resident:

As a reminder, Galveston County WCID No. 8 (“District”) has revised its grinder pump (Low Pressure Sanitary Sewer Systems) program, effective as of October 1, 2022.

Over the next few months, the District will be examining each grinder pump to ensure your grinder pump is in good working condition.

You may still call the District should an alarm sound during business hours. An operator will be dispatched, will assess the situation, and they will assist you in resolving the issue. However, should mechanical repairs be required, they are your responsibility. The following contacts will be able to assist you:

Pumps of Houston – 281-448-1352
JDC Fluid Equipment – 281-586-70807

Helpful information on how to care for your grinder pump can also be found at:
